

THE FIRST ANNUAL WLPP BOARD SUMMER SOCIAL

August 2, 2015

The White Lake Preservation Project's Board met at Joan and Conrad Gregoire's cottage, located on the north Shore of White Lake, for an enjoyable afternoon of conversation and food. It was a beautiful sunny day which gave us the opportunity to get to know each other better.

In addition to Board members, Melissa Dakers, Lake Stewardship Coordinator, Watersheds Canada attended to both meet us and to promote Watershed Canada's programs for Shoreline Rehabilitation and the White Lake Fisheries Habitat Project being done in collaboration with the WLPP. As an added bonus, Melissa brought a selection of shoreline plant for us to take to our cottages for planting. Many thanks Melissa!

The highlight of the afternoon was when Joan served us what could be the signature drink for the White Lake Preservation Project: **The Algal Bloom**.

This refreshing drink is made by blending together (in a powerful blender) 750 mL to a litre of pineapple juice, one English cucumber and half a dozen mint leaves. After blending, a splash of soda water can be added to give it some fizz.

This drink comes in its nature non-toxic version as well as a toxic algal bloom which contains your choice of a clear liquor such as rum, vodka or gin.
